Re: AMENDMENT

ABSTRACT/CLAIM:

A holster, to be worn around the waist of a user, and capable of storing at least one heated object, for instance a basalt lava stone, and at least one receptacle containing a fluid, said holster includes a thermally insulated compartment with fastening means and a thermally non-insulated compartment with fastening means, removable open storage lining portions for said compartments with fastening means, capable of being washed and then re-fastened inside one or both said compartments, said removable open storage linings are capable of storing at least one heated object, an outside storage compartment for a receptacle containing fluid and an adjustable sturdy nylon securing means with fastening clip for securing the holster to the waist of a user that is capable of sustaining weight up to 10 pounds or more.

I claim:

1. A wearable holster, capable of containing at least one heated object, said holster comprising a main back portion, at least one thermally insulated portion, at least one thermally open portion, and a securing means to secure the holster around the waist of the user.
2. A wearable holster according to claim 1, wherein said at least one thermally insulated portion includes a removable lining.
3. A wearable holster according to claim 1, wherein said at least one thermally open portion includes a removable lining.
4. A wearable holster according to claim 2, wherein said at least one thermally open portion includes a removable lining.
5. A wearable holster according to claim 1, wherein said at least one heated object is a stone suitable for use in massage therapy.
6. A wearable holster according to claim 2, wherein said at least one heated object is a stone suitable for use in massage therapy.
7. A wearable holster according to claim 3, wherein said at least one heated object is a stone suitable for use in massage therapy.
8. A wearable holster according to claim 4, wherein said at least one heated object is a stone suitable for use in massage therapy.
9. A wearable holster according to claim 1, wherein said securing means is a belt comprising an adjustment means, capable of adjusting the length of said belt, and a buckle to secure said belt.

10. A wearable holster according to claim 2, wherein said securing means is a belt comprising an adjustment means, capable of adjusting the length of said belt, and a buckle to secure said belt.

11. A wearable holster according to claim 3, wherein said securing means is a belt comprising an adjustment means, capable of adjusting the length of said belt, and a buckle to secure said belt.

12. A wearable holster according to claim 5, wherein said securing means is a belt comprising an adjustment means, capable of adjusting the length of said belt, and a buckle to secure said belt.

13. A wearable holster according to claim 1, wherein said wearable holster further comprising a storage portion capable of storing a receptacle containing liquids used for massage therapy, said receptacle being a suitable size to administer the contained fluid using a single hand.

14. A wearable holster according to claim 2, wherein said wearable holster further comprising a storage portion capable of storing a receptacle containing liquids used for massage therapy, said receptacle being a suitable size to administer the contained fluid using a single hand.

15. A wearable holster according to claim 3, wherein said wearable holster further comprising a storage portion capable of storing a receptacle containing liquids used for massage therapy, said receptacle being a suitable size to administer the contained fluid using a single hand.
